

Kitten Rescue

How can we revive a dehydrated, hungry cold kitten? By using fair tests, everyday materials and the right concentration of nourishing solutions.

The Kitten Rescue workshop is full of practical science investigations. It has been designed to cover a number of science curriculum subjects. That's why its so popular with teachers. Children love the wide range of experiments too. The kitten theme really captures their imaginations too. Everyone in the class works hard to help revive the kitten.

The workshop is adjusted to meet the learning needs of young scientists from Upper KS1 to upper KS2, so suitable from Year 2 and upwards. We bring specialist equipment and materials along so that children can perform their own scientific investigations on how to revive the poorly kitten.

Finally – Just to reassure teachers and children – there is no testing on any live animals in this workshop!
