

CSI Bloodspatters

You have to lose a lot of blood to kill a human so this is going to be a messy one! CSI Bloodsplatters

Our CSI Bloodspatters workshop is very popular – because its CSI, packed full of science and fires children's imagination.

We look at how blood spatters evidence and use of forensics can help reconstruct the events that took place at a crime scene.

We discover if the victim is indeed innocent, using a range of pupil led investigations.

Don't worry – we have a great recipe for fake blood to use during the workshop.
