
# Sensory Rockets

***The sensory rockets workshop is designed to use all of the senses. Your children will use their senses to make the scientific choices. Its also great fun and very accessible.***

Sensory Rockets for SEN Schools introduces the ideas of energy, force and fuel. The children perform lots of stimulating tests. We make sure that the children get the most out of the workshop by carefully tailoring the content and pace. There is a sensory finale to the workshop as the Rockets take off and land. This workshop is full of fun and drama, guaranteed to capture imaginations.
