

KS2 Rocket Challenge

KS2 Rocket Challenge has Energy and Forces, and great Space stories. Everyone builds and test flies a rocket – then it's time for a fun competition.

KS2 Rocket Challenge is one of our most frequently booked workshops. It is great fun, creating a real stir around the school. Best of all it is has lots of good science and practical space experiments that children love.

Your children will use the science they learn to build and test their rockets. At the end of the day they have a rocket to take home and show to family and friends.
